SEPA Environmental Event Report

Action	Complaint received via EPI mailbox:
Description	<p>19/06/2019 - 11:00hrs. Good morning, can I please register a complaint regarding the foul smell from the factory over the last 3 days and request this is investigated again. The smell is disgusting in [redacted] and I cannot open a window or hang out any washing to dry again. Does this breach ECHR article 8, I have raised this with the community council also.</p> <p>Regards</p> <p>19/06/2019 - 14:57 [redacted] emailed [redacted] back to advise that [redacted] was liaising with engineering and Environmental Managers at the site to try and ascertain if there is any specific activity taking place, or that has taken place in the last 3 days. She advised a SEPA officer was out at the site yesterday.</p> <p>20/06/2019 [redacted] visited the site to carry out a FIDOL odour assessment and meet with [redacted] 2 sisters (details of the odour assessment can be found in the electronic files and by reading ENV/0899534) substantiated the odours on Strathmore Avenue/ Princes croft and crofton/ Laings road as being offensive. [redacted] advised that [redacted] did not believe the source of the odour to be from a nearby AD plant or STW and attributed it maybe to the waste storage area on site?</p> <p>24/06/2019: [redacted] returned to work and wrote up CAS report following substantiated offensive odour detected by [redacted] This resulted in the site being low performance / poor. [redacted] spoke with [redacted] on the phone 14:45 advised [redacted] for information on the odour efficiency test results for scrubber abatement and an update on the maintenance for the carbon filters later updated the test will be carried out next Monday (1st July) and a carbon monitor has been brought on site to test efficiency of carbon filters.</p>
